

Stormwater pollutants make their way into where we fish, what we drink, and where we swim.

Everything that goes into a storm drain ends up in our waterways including:

- ◆ Grass Clippings
- ◆ Soap
- ◆ Pesticides
- ◆ Fertilizer
- ◆ Pet Waste
- ◆ Garbage

No one would want to swim in or drink from this pool, so don't let this happen to our waterways. Please be the solution to stormwater pollution. Don't let anything go down the storm drain other than rain water. To find out more please visit the City of Kalispell's website, www.kalispell.com, or call 406-758-7720.
